

Automatic Filter Systems

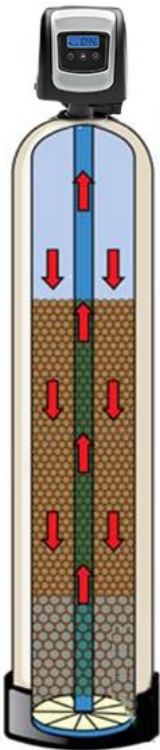

MODEL FF

Water

Essential for all dimensions of life.

FF MODEL

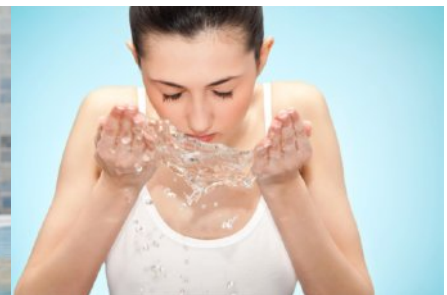

Experience the difference.

- The specialized filter is designed to eliminate common household water problems such as unpleasant taste and odour, discoloration, acidity, sediment, as well as heavy metals.
- Fully automatic & adjustable backwashing filters.
- No filter cartridge change-outs required
- Chemical free system available – Makes chemical regeneration unnecessary
- Low Electrical consumption annually
- Provides your family with cleaner, safer water and greater peace of mind.
- Saves on the carbon footprint

CONTROL VALVE FEATURES

- Fiber-reinforced polymer valve body for superior strength and durability, non-corrosive, and UV-resistant
- Continuous flow rate up to 15 GPM covering a wide range of applications
- Time-tested, hydraulically-balanced piston for service and regeneration
- Optical sensor for precision cycle positioning
- Diagnostics for historical valve performance
- Programming stored in memory and will not be lost due to power outages
